STEAM ROASTERS

During damp-heat treatment the physical-mechanical properties of the raw materials change; the surface forces, which keep oil in the raw material, decrease. It increases output of oil during further processing.

To solve the problem of oil-bearing seeds heating we manufacture 3-vat steam roasters. The heating area of the steam roasters is 3.4 m². Power consumption is 5 kilowatt. Dimensions: 1400x1400x2700 mm.
